

Our allomorphy jigsaw puzzle

- We will consider three ways in which allomorphy is triggered.
- **First phase:** divide into 6 small groups.
 - Two A, two B, two C.
 - Each discusses its own phenomenon.
 - These are the **Expert Groups**.

- **Second phase:** we create new groups, 5-8 **Jigsaw Groups**. Each Jigsaw Group must have at least one Expert from each of the Expert Groups (A, B, C).
- Each Expert explains their own phenomenon.
The Jigsaw Groups then discuss collectively:
 - What's the 4th pattern that's missing?
 - What would such a pattern of allomorphy look like?
